Petroleum engineers must have a bachelor's degree in engineering, preferably petroleum engineering. However, a bachelor's degree in mechanical, civil, or chemical engineering may meet employer requirements. Employers also value work experience, so college cooperative-education programs, in which students earn academic credit and job experience, are valuable as well.

History. Until 1900, civil engineering projects were generally managed by creative architects, engineers, and master builders themselves, for example, Vitruvius (first century BC), Christopher Wren (1632-1723), Thomas Telford (1757-1834) and Isambard Kingdom Brunel (1806-1859). In the 1950s organizations started to systematically apply
